A: There's a whole list of solutions in the firebase documentation here. Since you're using Phonegap, I would suggest you to take a look at this official Phonegap plugin and its repo. Q: Why are there so many unanswered questions? Unanswered questions Have a look at this question: This question is only getting 2 votes and has not been answered yet. Why is that? Can't they at least attract more votes by answering the question? Or is this a case of this question attracting the wrong kind of answers? A: You're right, this was closed as duplicated. The fact that it was an easy dupe and nobody caught it is nothing that we should be bothered with, though. Unfortunately it did attract some answers, which are not great. This is why I had the mod and a few other high rep users go through and leave comments and suggest edits to improve the question. Then, the question was re-opened, and I flagged it for re-closure as dupe. The other mods got in the comments (usually I am the last one to comment, which is why the mods are rarely pinged about such things), and all the mods decided to re-close. This is the only one of my recent flags that has been taken. I don't think there's any room to be sorry, as long as the moderators are willing to let me know when I do something wrong. I do get pinged a lot about things that aren't my doing, because there's no way to do a reputation audit and notice when something is getting flagged, so I really have no idea what's going on here. A: If you browse the list of unanswered questions, you'll see that most of them are duplicates, as they were marked as such. The reason for this is that the person who asked the question cannot accept the duplicate. You can vote to close as duplicates. However, I do see at least some of the questions that you mentioned in your post as questions that are not duplicates, and I think they should be closed as not constructive. There is no way for you to post an answer to them. The answers posted have been poor in general 2d92ce491b
