

(R) 14.4.20.0108 (C) 2020 Comfast I.S. LTD. All rights reserved.

Redistribution and use in source and I have tried everything. I have tried the 1.6.17, 1.8.2, and the latest 2.4.1 drivers. I have tried using a different computer. I have also been running the program on a Linux-based system. I have tried with and without the USB keyboard plugged in. I have tried searching for answers online. I am running out of ideas. I am at my wit's end, and I don't know what to do. Please help. Thank you. A: The problem was solved by doing a reinstall of the OS. After that, everything works fine. Be Your Own BFF: Setting
