mp4 download sau jhooth ek sach movie - sau jhooth ek sach Jun 18, 2017. The Uninvited - Sau Jhooth Ek Sach - Full. This is one of the best Indian movie in recent times and everyone loves it! The Uninvited is a 1997 Indian Tamil-language action thriller film directed by P. Vasu and starring Ajith Kumar, Asif Sheikh and Amala in lead roles, along with Q. m. q. mongoosejs: return only unique attributes I have this model called category var mongoose = require('mongoose'); var CategorySchema = new mongoose.Schema({ name: String, amount: {type: Number, min:1}, views: Number }); module.exports = mongoose.model('Category', CategorySchema); How can I return this model and only get the names of the attributes, so I could make it something like this.model('Category', CategorySchema).find({"name" : "khan"}); and get back [{"views", "name"}] I need it for a condition like this var something = this.model('Category', CategorySchema).find({"name" : "khan"}).count; I tried this.model('Category', CategorySchema).find({"name" : "khan"}).select("name").distinct(true); but it returns [{"views", "name", "_id"}] A: Take a look at select() for more on this: var collection = this.model('Category', CategorySchema); collection.find({"name" : "khan"}).select("name").distinct(true).exec(function(err, docs) { console.log(docs); }); docs in this case will be a cursor, and you'll need to iterate through the results with.forEach() to get them as an array, or use them with.next() (passing in a callback) to get the first result back. If you want to get a subset of fields, you can use.select() to specify a subset of fields like this: var collection = this.model('Category', CategorySchema); collection.find(2d92ce491b
