Flexible User Interface Designers are used to create macro actions within applications. These macros then can be put into schedules which allow a user to quickly use them. The interface designer can also be used to create custom menus for selecting features, creating new drawings, importing and exporting drawings. NetSuite extension was released and removed from the AutoCAD product. It provided a way to create macro-enabled functionalities by adding to the existing drawing. The NetSuite extension could be integrated with: - AutoCAD Architecture - AutoCAD Electrical - AutoCAD Inventor - AutoCAD Civil 3D AutoCAD can also be extended to interact with other software such as Microsoft Excel, Microsoft Powerpoint, and Microsoft Word. AutoCAD can also import data from external databases such as Microsoft Access and Microsoft SQL Server. Macros AutoCAD has powerful functions for macro programming, allowing users to automate repetitive tasks. The ability to program macros on the screen or within drawing file (.dwg or.dwgx) is controlled by the "Immediate" menu item in the "Manage" section of the "User Preferences" application. For more information on how to create macros see Macros in AutoCAD. The Macro language is based on the ObjectARX library and is executed by the AutoCAD ObjectARX application. ObjectARX is a C++ class library, which was also the base for: products extending AutoCAD functionality to specific fields creating products such as AutoCAD Architecture, AutoCAD Electrical, AutoCAD Civil 3D, AutoCAD Inventor, AutoCAD Electrical II, AutoCAD Foundry, and AutoCAD Mechanical. The

AutoLISP, Visual LISP, and VBA languages are used to create macros for AutoCAD. Macros are created using a coding language, and are typically triggered using a keyboard shortcut. LISP AutoLISP is the primary programming language used to create macros for AutoCAD. It has a similar syntax to Java and, as a scripting language, has the advantage of being extremely easy to learn. The syntax was originally based on a Common Lisp programming language, and then adapted for use with AutoCAD. AutoLISP is able to be extended by third-party developers to add the functionality they want. The main features of AutoLISP include: a1d647c40b
