It supports the generation of documentation for a single file, or multiple files, in different formats. The XmlInfo toolset allows you to quickly generate a large series of Readme files, bug fixes reports, changelogs, configuration instructions or installation guidance. It also enables you to streamline your documents and easily update them to match the current version of the program you work with.

Benjamin Pinkett Benjamin Pinkett (16 August 1767 – 25 July 1844) was a British music publisher, artist and author. Pinkett was born at Oxford and was educated at Oxford and at Exeter College, Oxford. He became a music publisher in London and in 1806 he moved to Brighton where he remained a resident until his death. Pinkett had an interest in astronomy and also in music. He was a friend of William Cowper and, as an associate of the Royal Astronomical Society, he was a close friend of John Herschel and met his son, William, for the first time in 1829. In 1816, he published a popular treatise on astronomy, entitled A New System of Celestial Astronomy, in which he elaborated on the concept of centring the Moon in relation to the Sun. The book became a popular seller and was translated into several languages. Pinkett's wife, Elizabeth (1775–1852), was also a talented artist and musician. The couple were the parents of Elizabeth Pinkett, who married the composer William Sterndale Bennett in
