A: As per @Nicholas, the issue was in the variable name. I've changed it to global and it's working: `global training_x global training_y ... def pred_func(inputs): return tf.matmul(inputs, inputs.T).sum()` Regulation of polymorphonuclear neutrophil chemotaxis in cyclosporine nephrotoxicity. d0c515b9f4

It gives you a list of drives on your computer and lets you see their.It has been recognized that the performance of integrated circuit devices is degraded as a result of junction leakage currents and ohmic contacts. The problem is further complicated by the fact that integrated circuit devices are becoming smaller and faster. The problem is particularly acute with dynamic random access memory (DRAM) devices in which both the cell transistors and the storage capacitors are fabricated on the same substrate. Accordingly, a need arises for a simple and effective technique for reducing junction leakage currents and improving ohmic contacts.Q: Java Casting Problem Ok, I've got a `System.out.println(a.getClass());` and the result is `java.lang.String[]` which i thought meant it was an array of strings. Then I tried to do `a.getClass().toString();` and got `java.lang.ClassCastException: java.lang.String cannot be cast to java.lang.String[]` Any ideas on why? A: When you print a Class object, the `toString()` method will be called automatically, and this causes the exception. Use `System.out.println(a.getClass().getName());` to print the name of the Class object. More information here. Ramatashvili: Russian model-turned-physicist shot dead Last updated on: August 21, 2011 11:07 IST A renowned Russian model-turned-physicist, who is a senior member of the University of Oxford's physics department, has been shot dead. Boris Ramatashvili was leaving a friend's house in the grounds of the University of Oxford early
