
premises deployment of an active directory infrastructure (which I personally recommend) Exchange Server Search Exchange Business Connectivity Services What You Need to Know Exchange Server Search (ESS) is a part of the BI's deployment of Exchange Server 2010. Exchange Server BI's is an entire set of tools where you can roll up all your business applications like the cloud, document management, Project and calendar, E-learning, etc. It is not required for your IMAP/SMTP/POP3 email service. Exchange 2010 was released earlier this year. Not all aspects of the product have been delivered yet. As the product is relatively new, it is difficult to get answers from Microsoft Support. The following sections have been provided to help you get up and running. Essential Concepts and Functions Installation Data Protection Exchange Database Active Directory Deployment Backup Exchange Transport Agent Administration Accounts Processors Mailbox Permissions Roles Configuration Domain Administration (also known as Active Directory) Domain Controller Organization Units (OU's) Group Policy Directory Services DNS Netlogon (NTLM) Domain Naming Service Logon Scripting Exchange Client Access FTP File Services (also called File d0c515b9f4
